

## Stock Guard Installation Instructions

### Instructions for Firearms with Scopes:

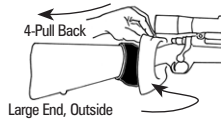

- 1) Turn Stock Guard completely inside out. (Rubber should be on outside.)

- 2) Slide large end of Stock Guard over buttstock. (Rubber should still be on outside.) Seam line should be on bottom.

- 3) Pull Stock Guard forward over stock until smaller end covers the pistol grip. Pull Stock Guard back (rightside out) only partially covering the stock.

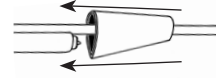

- 4) Adjust for perfect fit!

\*NOTE- for use with swivel stud, first unscrew stud, then make small incision in neoprene directly above swivel hole. Make cut just to left or right of seam. DO NOT CUT INTO SEAM!

### Instructions for Firearms without scopes:

- 1) Slide Stock Guard, large end first, over barrel and back toward pistol grip.

- 2) Adjust small end near pistol grip, then peel back partway, exposing black rubber backing.

- 3) Adjust for perfect fit!

\*NOTE- for use with swivel stud, first unscrew stud, then make small incision in neoprene directly above swivel hole. Make cut just to left or right of seam. DO NOT CUT INTO SEAM!
