

## How We Got Started

Beartooth Products TM has been manufacturing fine hunting, shooting, and other outdoor sporting accessories for over 12 years. Beartooth's first design and original product was the StockGuard. The inspiration came from the need to protect your gun finish from nicks and dings in tough hunting conditions. The Beartooth Wilderness then became our testing grounds and we have been producing goods in Bozeman, MT ever since. Beartooth's product line has grown and will continue to evolve with the needs of the demanding sportsman.
